September was a busy month for us with the different activities and the storms that caused havoc on the brook and the surrounding homes. Let me first start with recognizing the Fire Department 9/11 Memorial Monument Committee: Chief Geoffrey Gibbons, Former Chief Clinton Miller, Lieutenant Rick Alton, Commissioner Jim Nicol, President Craig Miller Sr., Secretary Craig Miller Jr., and Treasurer Jeff Ballanco. The design of the monument is fitting for the sacred steel beam that we acquired four years ago. I hope you get a chance to visit and appreciate it.

Hurricane Ida destroyed our Huff Pond inlets and changed the course of the brook in several locations, it also toppled at least six trees and several

more will be taken down for safety.

The road paving program is in full swing and will continue through October. We will add additional streets for paving to the list if we have any remaining funding from this year.

Mayor Mike Ghassali

There are several activities planned for the rest of the year, please check the borough calendar on our website.

I hope you enjoy autumn and let's start planning for the winter months and the upcoming holidays.

Montvale Police Department

I hope everyone is fully recovered from the damage caused by Tropical Storm Ida. I want to be sure to thank our volunteer firefighters and Tri Boro Ambulance Corp members for their amazing dedication. They spent a good portion of the storm responding to emergencies alongside our Police Officers. We would be unable to do our jobs without them, and our Pascack Valley DPW workers. School is in session, and Halloween is coming. Please drive carefully as many children are walking to school during the week, and as Halloween falls on a Sunday this year, children will be on the streets throughout the day.

Board of Health Deer Prevention

The New Jersey deer population is on the rise. White tail deer are known as “edge species” because their habitat is openings in forests created by agricultural practices. New Jersey provides deer with plenty of food but does not have enough predators to keep the population in check. When hungry deer come up to your house and start chomping away at your garden, here are some tips to deter them: Choose deer resistant plants. The Cooperative Extension of Bergen County (201- 336- 6780) can assist you in choosing plants that deer tend to avoid in our area. While no plant is completely ‘deer-proof’, it is very helpful to exclude their favorites from your landscape design.

Fencing is a great prevention method but can also be a costly one. There are several different types of fencing, but height is key. Deer can easily jump over fencing less than eight feet high. Electric fencing is more of a psychological barrier than a physical barrier. When a deer gets close to the fence, it gives off a timed pulse in a short duration to their nose or tongue. Wrapping trees in netting, chicken wire or wire mesh helps stop male deer from rubbing their antlers on your trees (to remove the velvet) while damaging your young trees in the process. If you are thinking about installing a fence, please contact the Planning and Zoning Department (201- 529-5757 extension 5) for permits and regulations.

Another preventative measure is chemical or organic deer repellents. Commercial and home-made repellents create unpleasant tastes, odors, stomach troubles, or pain when the active ingredients meet eyes, nose, or mucous membranes. Ask someone at your local hardware store, garden center or farming supply outlet which repellent works best for your area. If you are thinking about using repellent, it is best applied before the deer’s eating pattern is established. (March is ideal – so mark your calendar for next year!) During the growing season, apply the repellent on new plant growth, after heavy rains, and consistently every two to three weeks. Alternate the repellent you are using as deer grow accustomed to scents and tastes. During the peak of growth season, use an odor repellent over a taste one. (But go ahead and reapply the taste repellent on new growth only to keep the whole plant tasting bad.) Hang soaps with fatty acids and strong scents around the plants you want to protect. Changing things around keeps the deer on their toes and cautious.

Scare type devices can be used as another preventative measure. These are generally mechanical items that spin or move in the breeze, or noise emitting devices (ultrasonic and audible) that deer find unpleasant. This method works best when paired with another repellent method and when you periodically alternate the devices and locations, they are set up in. If deer are hungry enough to venture in your garden, they will quickly learn that your ‘scare tactics’ are empty threats and your tasty landscape is theirs for the taking.

Lastly do not feed the wildlife. By feeding wildlife it can attract unwanted company of other wildlife like rodents. Letting your dog roam free in a fenced in yard can help deter the deer as well.

Armed with these tips and with some patience and fortitude, you can outwit the deer and enjoy your landscape and the fruits (and vegetables!) of your labor

In the event of inclement weather, we will host the event at the Community Center which is located across the street from the basketball courts.

On Sunday, October 17th, look for us at the Montvale Street Fair. We will have a booth set up and would love to share our ideas and hear from you!

In November, the Committee will host a virtual Rangoli tutorial on Monday, November 1st at 4pm. The event is open to all ages, but space is limited, so early registration is recommended.

If you are interested in applying to become a Committee member, please email us to receive a link to apply. All applications are due by November 1st.
